

Applications

Entertainment, Videogaming, Medical, Military, Educational, Training, IPTV, movies, and an unparalleled number of custom applications can be enhanced by using TDVision's technology.

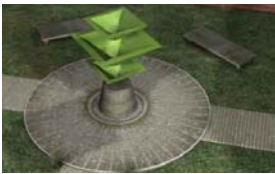

VIDEOGAMES: Get into the game by using TDVision's technology

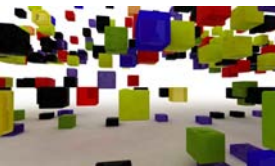

DIGITAL VIDEO: Capture your memories in true 3D and see them later just as if you were there, or watch movies, sports, events, concerts, and other content previously captured with a TDVCam in true 3D for your entertainment.

MEDICAL
MRI, CAT Scans, Surgeries, training, simulation can be realized in true 3D by using TDVision's technology

MILITARY
Surveillance, exploration, remote control, visualization, analysis, strategy, X Rays, thermal, infra red and other non visual spectrum can be 3D enabled by TDVision's technology

EDUCATION
Watch and learn in true 3D, go to other places without leaving the classroom.

TRAINING AND SIMULATION
Training courses, flight simulation or any other simulation use case.

CUSTOM APPLICATIONS
TDVision R&D can enable any application into true 3D by custom software development for plugins, addons and low level integration.
